(54) Title: STORAGE SYSTEM FOR RETAINING IDENTIFICATION DATA TO ALLOW RETRIEVAL OF MEDIA CONTENT

(57) Abstract: The invention relates to a data-storage  
system (100, 200) comprising a processor means (110,  
260) for obtaining identifier data of media content ex-  
isting in the system, the identifier data being used for  
identifying the media content, and a memory (120, 265)  
for retaining the identifier data after the media content  
is absent from the system, a retrieval means being ar-  
ranged to allow retrieval of the media content using the  
identifier data. The system, for example, a video cam-  
era retains the identifier data after the media content has  
been deleted or removed from the system. The identi-  
fier data may accumulate in the system independently of  
the media content, while the media content may still be  
retrieved.
